

Indigo™ Moxi™ Canal Receiver Technology

AutoPro4™

16 Channels, 16 Bands, Multiband Adaptive Directionality

HEARING AID FEATURES

3 additional manual programs provide maximum customization for individual needs and preferences

- Multiband adaptive directional microphone system tracks and suppresses up to 16 different moving noise sources, while focusing on sounds from the front
- AntiShock™ instantaneously reduces the level of impulse noises such as a door slam, while maintaining the quality and intelligibility of speech
- Speech enhancement LD analyzes the input signal and automatically emphasizes speech signals independently in each of the 16 bands. The amount of speech enhancement applied is based on the input level of the identified speech signals.
- Phase canceller continuously monitors for feedback and accurately calculates the required counter signal for feedback cancellation
- OnBoard™ control is easily configured as a volume control or program button
- MyMusic™ enhances the music listening experience by bringing out the rich, full tones of music
- Noise reduction analyzes input and automatically reduces noise signals independently in each of the 16 bands
- Wind noise manager intuitively engages based on moderate or high wind conditions
- Data logging accurately records the wearer's usage and manual program use
- 16 channels provide high resolution signal processing
- Low battery warning
- Start up delay
- On/Off by opening or closing the battery door
- Indigo™ Moxi™ can be programmed using NOAH-compatible U:fit™ and Standalone U:fit fitting software
- Battery size: 312
- Easy-t provides automatic switching to a dedicated telephone program
- Choice of 2 receivers

OPTIONS

- Coupling options for instant fittings
- Choice of shell colours

Indigo Moxi Power

Indigo™ Moxi™ is suitable for fitting mild to severe hearing losses; can fit audiogram configurations ranging from reverse to precipitously sloping.

Test Conditions:

Battery: 312

Source: Voltage 1.3 V

The measurements obtained with a closed configuration using a HA-1 coupler (ANSI-3-7-1995) or occluded ear simulator (EN 60711, coupling arrangement according to fig. 4 in the test standard).

The hearing aid set to linear, omni mode with all adaptive features disabled.

We reserve the right to change specification data without notice as improvements are introduced.
